

Imputation of Protein Activity Data using Deep Learning

Written by Gareth Conduit

Wednesday, 07 March 2018 09:07 - Last Updated Wednesday, 07 March 2018 09:17

At Optibrium's 2018 Drug Discovery Consultants' Day, Dr Gareth Conduit from University of Cambridge and Intellegens Ltd. described their deep learning methods for predicting compound activities against protein targets based on sparse training data and presented early results of a collaboration with Optibrium.
